

Model 600

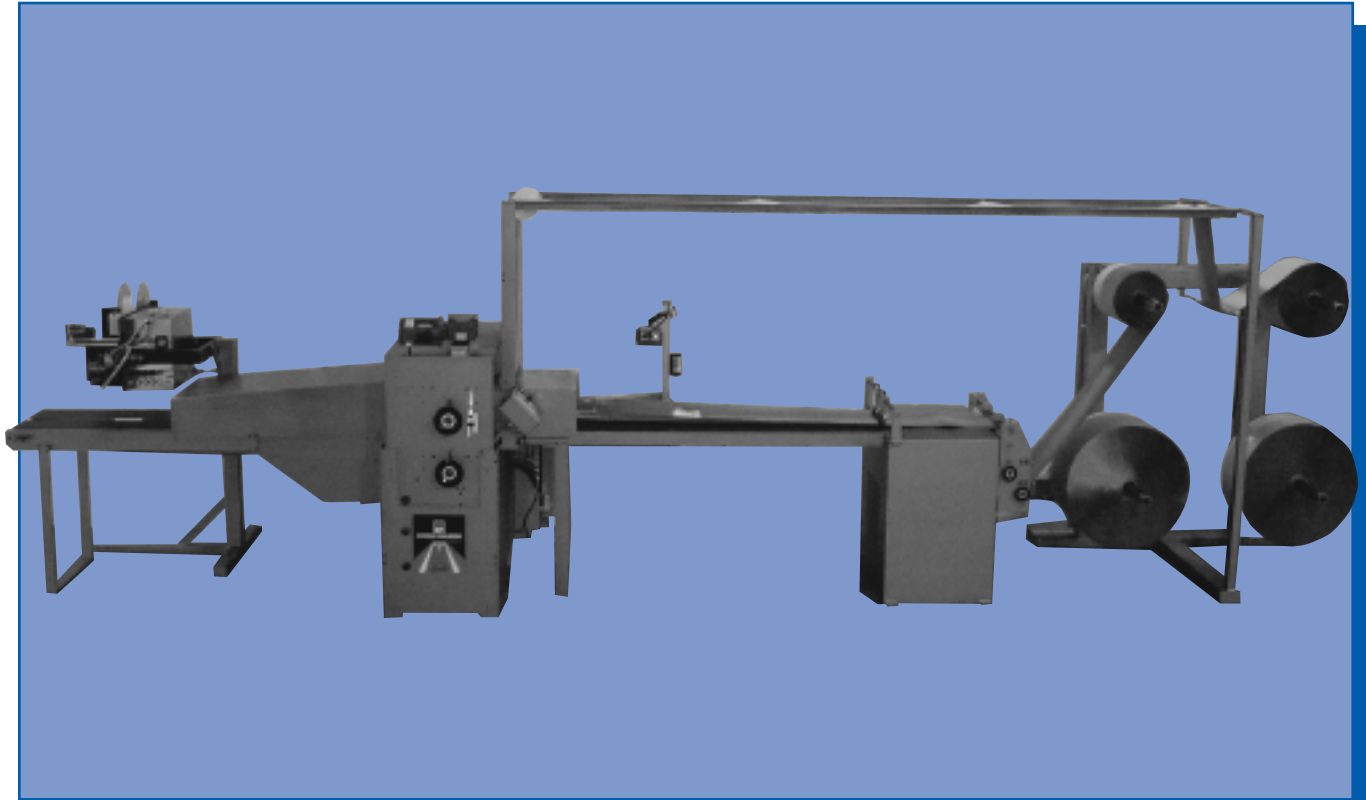

Photo shows machine with optional scan/print/apply labeler, dual roll holders, pneumatic spindles and barcode scanners.

Model 600 - Versatile horizontal double web packaging machine

The Model 600 is an extremely versatile horizontal double web machine designed to package three-dimensional pieces. The 600 is currently used by a number of leading manufacturers and book publishers. Products they are packaging range from publications, trophies, farm machinery parts, and crank shafts to automobile engine blocks.

The Model 600 comes in two models, the 600-18 and 600-36, and can be custom designed to meet your specific packaging needs.
