# Versatron™ Case Packer

The gentle case packer with SOFT-CATCH™ technology

Shown with optional Laner

The Standard-Knapp Versatron™ Case Packer is the industry standard in case packing equipment – and for good reason. Product manufacturers and co-packers alike insist on the Versatron due to its long life and broad application range. Boasting the fastest changeovers in the industry, it also features the quickest-to-learn and easiest-to-use operator interface. The Versatron employs SOFT-CATCH™ technology to gently cradle product as it lands in the case, enabling reduced-material plastics and glass to be packed without breakage.

**The Versatron™ Case Packer – The industry workhorse for a wide variety of applications.**

## Robust Construction

Stainless steel tubular frame

## High Reliability

Designed for 24/7 operation

## Simple Operation

Fast, easy operation

## Easy Walk-by Maintenance™

See-through safety guarding

## Flexible and Adaptable

To future applications

## Quality Fit and Finish

Proudly assembled in the USA

# Versatron™ Case Packer

## Simple Changeover

Quick and easy by-the-numbers changeover with color-coded change parts allows for short production runs. No tools, no sweat!

## Walk-by Maintenance

Lubrication and maintenance points are easy to see and access in a fast-paced production environment

## Intuitive Operator Interface

Our intuitive operator interface is easy to learn and easy to use. Simple pictures guide machine operation and fault recovery

## The Packaging Process Explained

The product and the empty case enter the machine via customer conveyors

Overhead braking and case braking is applied to allow the previous slug of product and case to evacuate

The product moves into grid area and is detected and stopped, case moves onto lift table and is detected and stopped

The lift table raises the case up, grid fingers enter and prepare the case for product

SOFT-CATCH™ – The product is dropped through the grid and into the case, where it is gently caught by the downward motion of the lift table

The packed case exits the machine via the discharge conveyor

## Versatron™ Floor Plans

## Versatron™ Case Packer Standard Features \*

The Standard-Knapp Versatron Case Packer features stainless steel construction and a servo casefeed & SOFT-CATCH™ lift table.

Model:	939S Case Packer, 949S Tandem Case Packer	Controls:	I/O devices, 24 Volts Contrologix or other upon request
Speeds:	Up to 45 cpm** Tandem up to 50 cpm**	Main Control Panel:	Mounted to machine opposite operator side
Case Types:	Plastic, Corrugated, HSC, RSC, Tablock, Tandem, Double Tier, Tray	Interface:	Panelview+ with Graphically Driven HMI
Infeed Style:	Butt Connect or available Side Sweep onto 5' infeed extension	Electrical Supply:	60 Amp, 460 VAC
Product Infeed Chain:	Intralox Series 900	Air Supply:	80 psi with 1/2" NPT
		Lubrication:	Clustered lubrication
Product Lanes:	1 – 8 lanes	Infeed Drive:	2 HP with VFD
Case Sizes:	6" – 18" wide	Casefeed Drive:	1/2 HP with VFD
Tray Height:	3" – full bottle height	VFD Controller:	Powerflex 40P
Industries Served:	Soft drink, beer, wine, liquor, chemical, personal care and food	Servo Controller:	Kinetix 6000, or other upon request

## Optional Equipment

- Servo laner
- Flap opener with flap scan
- Soft placement module
- Right-angle or counterflow casefeed
- Articulating arm for HMI
- 5 foot infeed extension
- Autolube
