

Fedco®

# TRANSFER PUMP

## APPLICATION

The Fedco® Transfer Pump is ideal for pumping flowable products such as cake batters, fruit fillings and pie fillings directly from the mixing bowl to the depositor hopper.

## FEATURES

- Pumps product from mixing bowl to depositor hopper
- Large 3" stainless steel piping for ease of transfer and gentle handling of product.
- Mounted on casters for portability
- Air operated
- Raises to enable mixing bowl to be removed, lowers into mixing bowl for pumping
- Pumps from mixing bowls up to 340 quarts in size eliminating the use of hazardous bowl hoists.
- Easy to clean by pumping hot water from mixing bowl through system.
- Transfer rate approximately 75 pounds per minute depending on density of product.
- Meets BISSC standards
