

CD100M Dri-Prime® Pump

The Godwin Dri-Prime CD100M pump is an extremely powerful yet compact pump with flow capabilities to 230 m³/hr and discharge heads to 38 metres.

The CD100M features the unique Godwin high pressure oil bath mechanical seal design. This allows for dry running for prolonged periods while automatically priming and repriming. Able to perform in the toughest conditions, the CD100M can handle solids up to 45 mm in diameter. This makes it an extremely effective pump, suitable for both slurry and clean water applications. The powerful CD100M has proven itself a pump of choice for sewer bypass, general dewatering and many other applications.

Features and Benefits

- Fully automatic priming from dry to 8.5 metres suction lift.
- Godwin Dri-Prime is a continuously operated Venturi air ejector priming device which requires no periodic adjustment or control.
