## EM 103

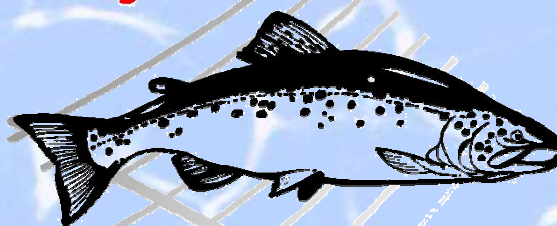

This new type pinbone remover, is working after the same principles as our latest produced Machine EM102,  
This means that this machine like our other machines has a very low meat loss.  
And is very gently to the filets, which means gaping not appears on a correct adjusted machine.

The capacity is 700 – 1200 kg. Fresh or smoked filets pr. hour. Depending of the type of fish.

The machine is an alternative to our other machines. The machine is using air **or** water to keep the rollers clean. Furthermore the design is changed
