

Type – FB 220

Packaging machine - Wrapping, forming and cartoning machine

Product - butter

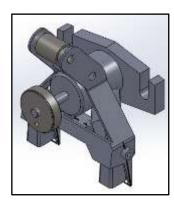

Production capacity - up to 300 product / minute

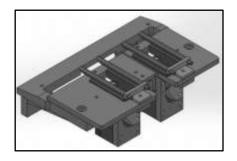

Corazza FB 220 technical details

- Wrapping machine studied for rectangular product
- Extrusion dosing system, through double nozzle
- Level control system for automatic feeding in the hopper
- All parts in contact with product are made in stain less steel
- Capacity max 300 stock cubes /minute (*)
- Machine equipped with twin folding box
- Oil bath for mechanical equipment inside the machine structure
- All movement is drive by cam
- Cutting made with guillotine
- Power required 3 kW
- Cubes exit in one or two rows side by side or head to head
- Machine works with a motor served by inverter
- Touch screen operator panel
- In case of product lack machine stops
- In case of finish paper machine stop
- Speed controlled by operator panel
- Production monitoring with statistic value
- Hopper cover to avoid foreign body fall in the mass
- Machine equipped with safety protection according to the UE roles

Nozzle dosing system

Folding box

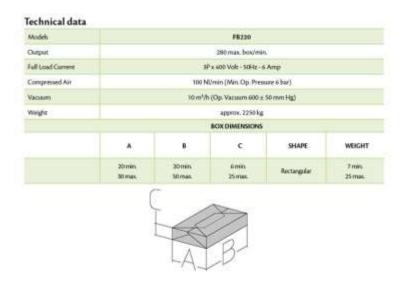

Hopper feeding system with cover

Paper characteristic

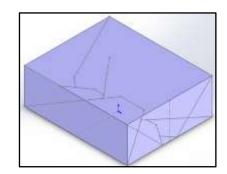

- Type of wrapping material parchment-backed alufoil or other flexible material with suitable characteristics
- Paper could be continuous printer or electronically centred
- Specific drawing of single paper
- Type of wrapping style: "Porfolio"

Butter characteristic

- Size of the butter cubes (27 x 40 x 8 10) mm
- Weight (9-12) gr
- Dimension of product admitted +/ 0,1 mm
- (*) Butter characteristics could modify machine reaction in packaging
