

PRX-900 PILOT STERILIZERS

FULL IMMERSION • PARTIAL IMMERSION • SPRAY
SATURATED STEAM • STEAM-AIR

- **STOCK** multifunctional pilot retorts provide the flexibility to develop and optimize heat transfer and sensory profiles for multiple container geometries and recipe formulations utilizing various process and agitation modes
- Develop seamless process transitions for production sterilization equipment employing our **ICON** sterilization management system
- Available on-board linear deflection container sensor automatically generates the perfect auto-overpressure setpoint ramp and hold steps. Completely eliminate the guesswork of pressure profile development

STRUCTURE

CLAMPING DEVICE

- New multi-process and agitation modes
- Standard stainless steel construction
- Award winning **ICON^{SMS}** controls
